

20 - Backups and Recovery Procedures

Objectives

- Understand how to use 'upgrade_export' to backup a SmartCenter
- Understand how to use 'upgrade_import' to clone a SmartCenter
- Understand how to migrate a SmartCenter from a Windows platform to Check Points SecurePlatform
- Know how to create backups of the Firewall
- Know how to restore from backups
- Know how to create snapshot images
- Know how to restore from a snapshot image

Prerequisites

- Complete Module 20
- Virtual machines MgmtSite1, fwsite1 & classrouter must be running

Approximate time for completing each section

Section 1	Backing up the SmartCenter	60 minutes
Section 2	Backing up the Firewall on SPLAT	45 minutes
Section 3	SPLAT Maintenance Mode	15 minutes
	Total time	2 Hrs

Contents

1	Backing up the SmartCenter	3
1.1	SmartCenter Configuration - 'upgrade_export' & 'upgrade_import'	3
1.1.1	Using upgrade_export	3
1.1.2	'upgrade_export' and Policy Revisions	4
1.2	Cloning a SmartCenter – 'upgrade_import'	5
1.2.1	Setting the Hostname & IP Address	5
1.2.2	Install the SmartCenter using an Imported Configuration.....	5
1.2.3	Test the New Cloned SmartCenter	8
1.3	Moving a SmartCenter from Windows to SecurePlatform	10
1.3.1	Building a Virtual Machine for the SecurePlatform SmartCenter	10
1.3.2	Creating a base Install.....	11
1.3.3	Copying the upgrade_export file cpexport.tgz to the SecurePlatform..	13
1.3.4	Completing the Install – Run 'sysconfig'	14
1.3.5	Testing the Install	17
1.4	Reset the Environment back to using the Windows SmartCenter	18
1.4.1	Change back to the Windows SmartCenter.....	18
2	Backing up the Firewall on SecurePlatform	19
2.1	Creating Backups – 'backup'	19
2.1.1	Create a backup of the Firewall	19
2.1.2	Setting Automated Backups using the WebGUI	19
2.1.3	Local backup Directory	20
2.2	Recovering a Backup file using 'restore'	21
2.2.1	Using Restore to recover a Firewall	21
2.3	Snapshot Images – 'snapshot'	22
2.3.1	Creating a snapshot	22
2.3.2	The snapshot Directory	22
2.4	Restoring snapshot Images – 'revert'	23
2.4.1	Restore a snapshot Using 'revert'	23
3	SPLAT Maintenance Mode	24
3.1	Maintenance Mode – Single User Mode	24
3.1.1	Boot into Maintenance Mode – Single User	24
