

6 - Creating Network Objects

Objectives

- Understand the type of objects that can be used in a Security Policy
- Create the Firewall object and change some parameters
- Establish trust between the SmartCenter and Firewall
- Understand how to set Anti-spoofing
- Know how to set the maximum concurrent connections through the Firewall
- Know how to break and reset Secure Internal communications (SIC) between a SmartCenter and Firewall
- Create the basic objects required for the classroom environment

Prerequisites

- Complete Module 5
- Virtual machines MgmtSite1 & fwsite1 must be running

Approximate time for completing each section

Section 1	Object Types	15 minutes
Section 2	Creating the Firewall Object	15 minutes
Section 3	Creating General Network Objects	25 minutes
	Total time	55 Min

Contents

1	Object Types	3
1.1	Object Type.....	3
1.1.1	Creating Objects.....	3
1.1.2	Object Type - Services.....	4
1.1.3	Object Type – Resources.....	4
1.1.4	Object Type – Servers & OPSEC applications.....	4
1.1.5	Object Type – Users and Administrators.....	4
1.1.6	Object Type – VPN Communities.....	4
1.1.7	Network Objects – Check Point.....	5
1.1.8	Network Objects - Node.....	5
1.1.9	Network Objects – Network.....	5
1.1.10	Network Objects – Groups.....	6
1.1.11	Network Objects - Dynamic.....	6
1.1.12	Network Object – Others.....	6
1.1.13	Network Object – VoIP Domains.....	6
2	Creating the Firewall Object.....	8
2.1	Check Point Gateway Object.....	8
2.1.1	Create a New Check Point Gateway.....	8
2.1.2	Set the Hostname and IP address 172.21.1.1.....	8
2.1.3	Select Check Point Products.....	9
2.1.4	Set Secure Internal Communications.....	9
2.1.5	Setting the Topology – Get Interfaces.....	10
2.1.6	Setting Topology – Get Interfaces with Topology (Anti-spoofing).....	10
2.1.7	Making Topology Changes.....	11
2.1.8	Setting SmartDefense Profile.....	12
2.1.9	Setting Supported Gateway Authentication Schemes.....	13
2.1.10	Setting Logs And Masters.....	13
2.1.11	Capacity Optimization.....	14
2.2	Breaking and Resetting SIC.....	15
2.2.1	Reset SIC on the Firewall.....	15
2.2.2	Test Trust for the Firewall Object in the SmartCenter.....	16
2.2.3	Reset SIC in the Firewall Object.....	16
3	Creating General Network Objects.....	18
3.1	Creating the Network Type Objects.....	18

3.1.1	Create the Internal Network.....	18
3.1.2	Network Object – Broadcast Address.....	18
3.1.3	Create the DMZ Network.....	18
3.1.4	Create the External Network.....	19
3.1.5	Create the Remote Site Network.....	20
3.2	Creating Node Type Objects.....	20
3.2.1	Create the Internal Web Server Host.....	20
3.2.2	Create the DMZ SMTP Server Host.....	21
3.2.3	Create the DMZ Web/FTP Server Host.....	21
3.2.4	Create the Class Room Web Server Host.....	22
3.3	Creating External FTP servers for ftp.hp.com.....	22
3.3.1	Using nslookup.....	22
3.3.2	Creating the FTP Servers – Cloning Objects.....	23
3.3.3	Creating a Group Object.....	24
3.3.4	Create the Classroom Router – Gateway Object.....	24
3.4	Summary of Objects Created.....	25
